MEMORANDUM

DATE: November 15, 2000

SUBJECT: Additional Detail on Revised Recreational Vehicle Emissions Inventories

FROM: John Mueller, Mechanical Engineer
Assessment and Standards Division

THRU: Glenn Passavant, Nonroad Center Director
Assessment and Standards Division

TO: Docket A-98-01

We have revised our inventory estimates for the categories of vehicles and engines included in our proposed finding concerning new nonroad spark-ignition engines rated above 19 kilowatts and new land-based recreational spark-ignition (Large SI) engines.^a This memorandum presents additional detail for the recreational vehicle inventories, both nationally (Table 1) and in selected nonattainment areas (Table 2). The details of the modeling for these inventories are documented in a separate memorandum to docket A-98-01.

1. We believe that there is snowmobile usage in Connecticut. However, we do not have good snowmobile allocation data for Connecticut, and have chosen to show no snowmobiles in Connecticut rather than attempt to estimate Connecticut snowmobile population.
